SUMMARY

AI/LLM and backend engineer with 2+ years building LLM-powered products and cloud-native services on AWS. Built AI Cloud Insights, a Bedrock-based GenAI platform, from scratch as the sole engineer, then led 3 developers through public launch. Creator of agentic-gate, an open-source guardrail library for LLM tool-calling, published on npm and PyPI. AWS Certified Developer - Associate.

TECHNICAL SKILLS

AI / LLM: AWS Bedrock, LLM agents and tool-calling, Pydantic, Zod, LangChain (basic)

Backend: Python, TypeScript, Node.js, Fastify, REST APIs, microservices, event-driven systems

Cloud and DevOps: AWS (Lambda, API Gateway, ECS/Fargate, EventBridge, DynamoDB, S3, CloudFront, EC2, IAM/STS, Security Hub), CloudFormation (IaC), Docker, GitHub Actions CI/CD

Data and tools: PostgreSQL, MongoDB, DynamoDB, Redis, Linux, Git, Next.js, Postman

AI-assisted development: Claude Code, GitHub Copilot

EXPERIENCE

Software Developer, Expert Cloud Consulting (ASCP GPUonCLOUD Pvt Ltd) June 2024 - Present

- Built AI Cloud Insights from scratch as the sole engineer (Bedrock LLM backend, frontend, CI/CD); after the first version, onboarded and led 3 developers and took it to public launch.
- Built GenAI bots (SecurityBot, CostBot, Activity Assistant) that use LLM function calling to invoke cloud APIs and answer natural-language queries for multi-cloud operations.
- Designed the account-scanning and analysis flow that surfaces AWS cost and security findings to users through natural-language chat.
- Engineered multi-tenant backend microservices in Node.js and Python, with serverless event-driven flows on AWS Lambda and EventBridge.
- Shipped to production about 13 times a week with a 3.6-minute median deploy time through CI/CD (160+ merged PRs).
- Containerized a service with Docker and deployed it on Amazon ECS with AWS Fargate for a client workload.
- Wrote AWS CloudFormation templates (IaC) that shortened client environment provisioning time.

PROJECTS AND OPEN SOURCE

agentic-gate | creator and maintainer (npm and PyPI) Aug 2026

- Built a cross-language (TypeScript and Python) validation engine for LLM agent tool-calling, with a circuit breaker that stops runaway retry loops.
- Validates arguments locally with Zod/Pydantic before execution, preventing retry loops and cutting API calls.
- Automated npm and PyPI releases via GitHub Actions Trusted Publishers, with 100% test coverage through v1.4.0.

EcoScheduler | AWS EC2 cost optimization tool | github.com/Akhilesh-Varute/EcoScheduler 2026

- Built a serverless application on AWS Lambda, API Gateway, DynamoDB and EventBridge that automates EC2 start/stop schedules across multiple AWS accounts, with a Next.js dashboard.
- Implemented cross-account access with STS AssumeRole (no stored credentials), JWT authorization with role-based access, a dry-run mode and a full audit log.

EDUCATION AND CERTIFICATIONS

PG-DAC, Sunbeam Infotech / C-DAC 2024

B.Tech Textile Engineering, DKTE's Textile and Engineering Institute 2022

AWS Certified Developer - Associate 2025
